ABOUT US

Founded in 1988, PC Link has emerged as a **leading distributor of hardware and software solutions in Egypt**. Based in Alexandria, our mission has always been to deliver innovative, reliable solutions coupled with a steadfast commitment to customer satisfaction.

Over the years, PC Link has evolved into a trusted systems integrator, providing tailored IT roadmaps for our customers from diverse sectors.

Strategic Partnerships:

PC Link maintains strong partnerships with industry leaders like Dell, HP, HPE, Lenovo, Broadcom (VMware) , Veeam, Microsoft, Symantec, Cisco, and Intel, ensuring that we offer cutting-edge technology and comprehensive support.

MISSION, VISION & OBJECTIVES

Mission

Bringing the finest technology products and services to the global market, enhancing our customers' operational capabilities.

Vision

To be recognized as a premier IT solutions provider, focusing intensely on innovative solutions and business excellence.

Objective

To offer meticulously designed products and expert-level support, ensuring seamless integration into your business operations.

CORE VALUES

Commitment

Dedicated to the success and satisfaction of our customers.

Integrity

Upholding honesty and strong moral principles in all our actions.

Speed

Ensuring swift delivery and rapid implementation of solutions.

Seamlessness

Smooth integration and user-friendly solutions that enhance business processes.

WHAT WE DO?

PC Link provides a comprehensive range of **IT products** and services, designed to meet the evolving needs of businesses across various sectors. As a systems integrator, we specialize in sourcing, configuring, and deploying complex IT solutions that streamline operations and enhance business efficiency.

Our offerings are crafted to support businesses in achieving a seamless digital transformation and maintaining competitive advantage in their respective markets.

CORE TECHNOLOGY SOLUTIONS

PC Link offers a variety of essential technology solutions that are foundational to modern business operations:

Networking Solutions

Comprehensive solutions for LAN, MAN, and WAN deployment that align with client networking needs and budgets.

Cloud Solutions

Scalable cloud computing solutions that enhance data accessibility and business agility.

Systems Integration

Tailored IT roadmaps from inception to deployment, ensuring alignment with business goals.

Remote Work Solutions

Advanced telecommuting tools and technology to empower a mobile workforce.

Web Technology

Custom web applications utilizing the latest in Internet/Intranet technology.

Data Security and Cybersecurity

Robust security measures to protect critical business data and infrastructure from cyber threats.

IT Support and Maintenance

Proactive and reactive support to ensure optimal operation of IT systems.

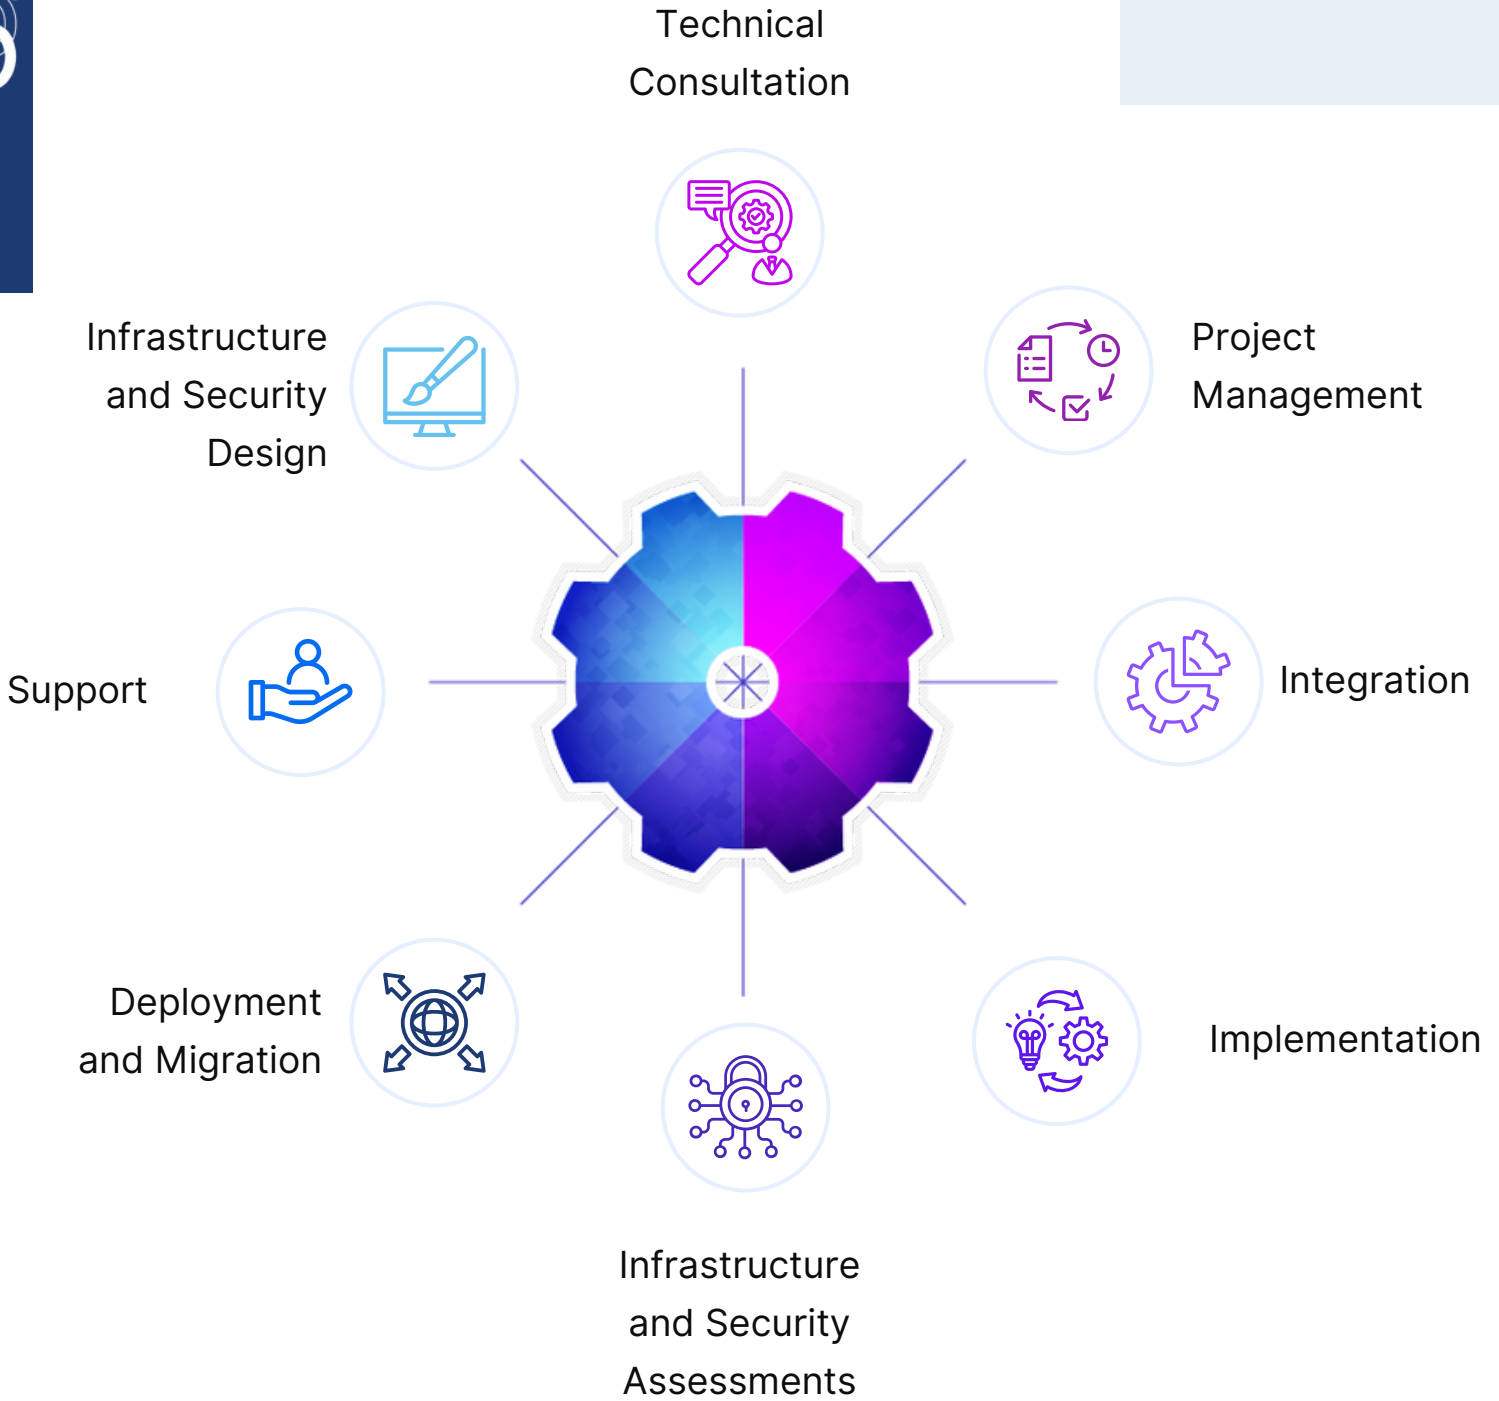

Document Management

Solutions for a paperless work environment including document storage and data archiving.

Video Conferencing

State-of-the-art video conferencing systems that facilitate effective communication.

PC LINK'S TECHNICAL SERVICES

PC Link delivers comprehensive IT solutions across a variety of sectors:

TELECOM

OIL & GAS

GOVERNMENT

HEALTHCARE

RETAIL

EDUCATION

REAL ESTATE

MANUFACTURING

OUR PARTNERS AND ALLIANCES

As a recognized partner of global technology leaders, we offer a vast product portfolio, including:

PC LINK'S MANAGED SERVICES PROVIDER (MSP) AND MAINTENANCE SERVICES

Introduction to PC Link's MSP Services

In the dynamic landscape of information technology, organizations face the challenge of maintaining robust, secure, and efficient IT systems while also focusing on their core business operations. PC Link addresses these challenges by offering comprehensive Managed Services Provider (MSP) solutions. As an MSP, PC Link assumes the responsibility of a complete IT department, managing all aspects of a client's IT infrastructure, from system monitoring and data management to cybersecurity and cloud services.

Scope of MSP Services

PC Link's MSP services are designed to alleviate the burden of day-to-day IT management, allowing businesses to focus more on strategic growth initiatives. Our services are characterized by proactive support, strategic planning, and a focus on security and scalability. Here's what businesses can expect:

Proactive Monitoring and Management

Continuous oversight of your IT environment to ensure all systems operate optimally and issues are resolved before they escalate into serious problems.

Security and Compliance

Implementation of advanced security measures to protect against threats, along with ensuring compliance with relevant laws and regulations.

Cloud Services Management

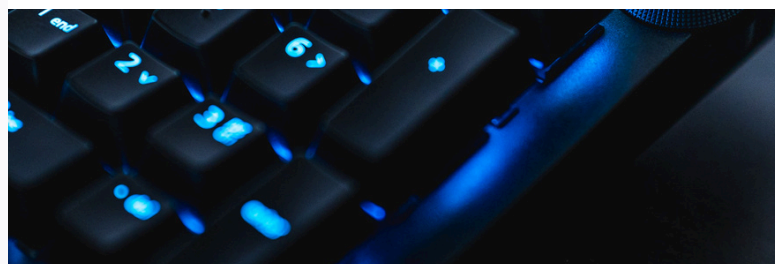

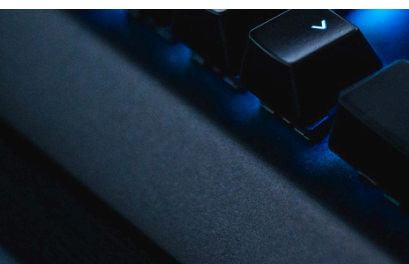

Support with cloud infrastructure, including deployment, management, and optimization of cloud resources.

Backup and Disaster Recovery

Robust data protection strategies to safeguard critical business data and ensure quick recovery in the event of data loss.

Support and Helpdesk Services

Round-the-clock support to address IT issues swiftly and efficiently.

Benefits of Partnering with PC Link as Your MSP

Choosing PC Link as your MSP brings several advantages:

COST EFFICIENCY

Reduces the need for in-house IT staff and associated overhead costs. Our scalable services are tailored to fit your budget and needs.

EXPERTISE AND EXPERIENCE

Access to a team of IT experts who are equipped with the latest knowledge and skills in cutting-edge technologies.

RISK REDUCTION

With our expert management of your IT systems, experience improved uptime and performance, contributing to better business outcomes.

OPERATIONAL EXCELLENCE

Enhanced security protocols and proactive monitoring significantly reduce the risk of security breaches and data loss.

PC LINK'S MAINTENANCE SERVICES

Beyond our MSP offerings, PC Link provides extensive maintenance services designed to ensure the longevity and reliability of your IT infrastructure

- **Hardware Maintenance:**

Regular checks and repairs of physical components like servers, workstations, and networking devices to prevent hardware failures.

- **Software Maintenance:**

Includes updating and patching of software to secure and optimize your systems. This also covers troubleshooting and support for software issues.

- **Network Maintenance:**

Ensuring that the network is secure, efficient, and up-to-date with the latest network technologies and practices.

- **Custom Service Agreements:**

Flexible maintenance contracts tailored to meet the specific needs and budget constraints of different businesses.

Innovative Maintenance Strategies

PC Link employs a range of innovative strategies to deliver superior maintenance services:

Predictive Maintenance:

Using advanced analytics to predict and prevent potential failures before they occur.

Routine Inspections and Audits:

Regularly scheduled assessments to ensure all systems and protocols are up to standard.

User Training and Support:

Empowering users with the knowledge and tools they need to utilize IT resources effectively and safely.

Conclusion

PC Link's Managed Services and Maintenance solutions are at the core of our commitment to enabling business success through technology. By outsourcing your IT management to PC Link, you not only gain access to top-tier IT support and services but also align your **IT strategy with your business objectives**, ensuring that technology serves as a backbone for growth and innovation.

In conclusion, partnering with **PC Link means securing a reliable ally** who understands the intricacies of managing complex IT environments, enabling your business to thrive in an increasingly digital world.

PC LINK SOFTWARE DEVELOPMENT SERVICES

Introduction

In today's digital era, a strong online presence is vital for business success. PC Link recognizes this imperative and offers specialized software development services with a particular focus on website and e-commerce development. This chapter delves into how PC Link empowers businesses by creating robust, scalable, and efficient digital platforms that not only attract customers but also enhance user engagement and drive sales.

PC Link's Approach to Web Development

PC Link's web development services are tailored to meet the unique needs of each client, ensuring that every website is not only visually appealing but also functional, secure, and optimized for search engines. Here's how we approach the development of websites and e-commerce platforms:

01

Discovery and Strategy:

Every project begins with a thorough analysis of the client's business, target audience, and goals. This phase helps in crafting a strategic plan that aligns with the client's business model and market demands.

02

Design and User Experience (UX):

Our team of expert designers works to create intuitive and engaging designs that reflect the brand's identity and enhance user experience. We focus on usability, aesthetics, and responsive design to ensure the website is accessible on all devices.

03

Development and Integration:

Using the latest technologies, our developers build high-quality, scalable websites. We ensure that the back-end is as robust as the front-end is appealing. Our services include CMS development, custom programming, and integration with third-party services like payment gateways, CRM systems, and more.

04

Testing and Quality Assurance:

Rigorous testing is conducted to ensure the website operates smoothly across all platforms and browsers. This includes functionality testing, performance testing, security audits, and user acceptance testing (UAT).

05

Launch and Optimization:

Once the website meets all quality standards and client expectations, it is launched. Post-launch, we focus on continuous optimization based on user feedback and analytics.

E-commerce Development Expertise

E-commerce solutions by PC Link are designed to drive sales and manage high traffic volumes seamlessly. Here's what we offer:

Custom E-commerce Solutions:

Tailored online stores that cater to the specific needs of the business and its consumers. Features might include advanced product filtering, custom checkout processes, and unique promotional tactics.

Shopping Cart Integration:

Implementation of various shopping cart software solutions, depending on the client's needs and preferences.

Payment Gateway Integration:

: Secure and reliable integration of multiple payment gateways to facilitate easy and safe transactions.

Scalability and Security:

E-commerce websites built with a focus on scalability to handle growth and high traffic volumes, alongside robust security measures to protect sensitive customer data.

Specialized Services for Enhanced Online Presence

Beyond basic website and e-commerce development, PC Link offers specialized services designed to enhance your online presence:

SEO and SEM Services

Ensuring that your website ranks well in search engines and attracts quality traffic through organic and paid search strategies.

Mobile Optimization:

Developing responsive designs and mobile applications to ensure an optimal viewing experience across all devices.

Content Management Systems (CMS):

Custom CMS solutions that allow clients to manage content efficiently without technical assistance.

Maintenance and Support:

Ongoing support and maintenance services to ensure the website remains updated with the latest technologies and security patches.

Conclusion

PC Link's comprehensive approach to website and e-commerce development ensures that businesses not only have a functional online presence but one that actively contributes to their growth and success. Our end-to-end services, from initial consulting to ongoing maintenance, make PC Link an ideal partner for businesses looking to thrive in the digital space. By leveraging our expertise, businesses can unlock new opportunities, improve customer engagement, and drive significant online sales.

Artificial Intelligence (AI):

PC LINK leverages its strong partnerships with leading industry players to **develop AI-driven solutions that transform business** operations and customer experiences. Our expertise encompasses machine learning, natural language processing, and AI-driven analytics, enabling us to create intelligent systems that optimize performance, enhance predictive maintenance, and facilitate advanced decision-making capabilities for our clients.

This proficiency allows businesses to harness the power of AI to drive innovation and achieve substantial competitive advantages in their respective industries.

Mobile Applications:

With extensive experience in mobile application development, PC LINK provides comprehensive services that cover the full lifecycle of app creation, from initial strategy formulation to design, development, and marketing.

We specialize in crafting mobile solutions across various platforms including iOS, Android, and Windows, ensuring a seamless and engaging user experience.

Our capabilities extend to multi-platform development and porting, allowing businesses to reach a broader audience by adapting their applications to different operating systems with minimal additional investment.

Internet of Things (IoT):

PC LINK is at the forefront of integrating IoT **technologies to enable smarter solutions** in various sectors including manufacturing, healthcare, and smart city applications. Our IoT capabilities include sensor integration, real-time data analytics, and the creation of interconnected ecosystems that facilitate the exchange and analysis of data across devices. This empowers our clients to unlock new efficiencies, enhance real-time decision-making, and introduce innovative services that leverage the full potential of IoT connectivity.

Through these technologies, **PC LINK continues to support and elevate** businesses by providing advanced, tailored solutions that meet the evolving needs of our diverse clientele.
